Hello my friends.

In this manual I will give you practical advice on how to make effective spells based on herbs and other natural elements.

First of all, I want to tell you that when we decide to do a ritual or ceremony, it is essential to pay attention to certain ancestral advice.

It is highly advisable to have all the elements that are mentioned in the ritual that we will do, that everything is within your reach before starting the ceremony.

Take a bath to help us cleanse and purify yourself. This can be done with a little rosemary, rue and bay leaf.

These herbs are added in the water of the bathtub, and if you do not have one, the mixture is thrown on the body under the shower, in the last rinse.
You must walk through the whole room where the ritual will be done with an incense.

You can do it with a toothpick, or with little coals inside a thurible or in a pan or vessel used for this purpose.

The ideal aromas are: incense, sandalwood, myrrh, spikenard. You should smoke the whole room.

It is fundamental to keep an optimum emotional mood and to be in good physical and mental condition, deprived of negative thoughts and worries.
Let's start with some basic concepts.

To protect ourselves and feel safe, without anyone interfering with our energy or exerting negative vibes on our body or mind, it is sometimes necessary to cast some kind of spell or make some kind of talisman.

**Spell:**

A spell is a ceremony or ritual with a magical meaning, which is cast by uttering certain prayers or specific invocations to reach a certain goal. In general, spells are used to cast negative entities out of a person, home, or business.

It used to be called exorcism. In order to use it, certain formulas are used in words, candles, smoke or incense with particular scents.
**Talisman:**

Talisman is a magical figure in which we try to represent a force.

This force that one wishes to attract must be represented in such a way that it is in harmony with the Universal Forces. It is very important to be clear about why the Talisman must be made.

Manufacturing one should not be done as a game or a custom; it should be taken as a sacred art.

Let us not forget that a Talisman attracts and is in harmony with the Divine Universal Forces.

The reason or purpose for which you are going to make the Talisman is very important. From the moment you begin to generate it in your mind as an idea and until its completion, you are charging it with your energy. That's why it is also very important to be willing and concentrated in the construction of the Talisman.
The traditional talisman is built with a piece of metal, mineral or stone that must be engraved and consecrated so that it can exercise its true power. Once consecrated, no one can touch it but you.

Another way to make a talisman is with a parchment, which should preferably be virgin.

Any person is capable of making a talisman, but it will give what it promises only to the person who consecrated it. The power of this object is conferred on the one who possesses it, and with its use no one can be harmed.
How to make Talismans

Love Talisman

This talisman is useful to be able to preserve the tranquility and harmony in a couple.

It protects from any negative influence that could affect it.

It is advisable to make this talisman on a Friday, when your lunar phase is in the crescent quarter, at the time of dawn.

Proceed to draw on a parchment, preferably virgin, a circle of 6 cm in diameter.

Cut out the circle made on the parchment and write the names of the couple, in colored ink, following the outline of the circle.

On the other side of the circumference, you should write "Venus", in the form of a cross, that is, vertically and horizontally.
Wrap the circumference in a light-colored handkerchief, and there pour some drops of perfume, the favorite of each member of the couple.

The talisman must be kept in the bedroom, so no one but the couple can access it, or even see it.

**Personal Talisman to Reactivate Cosmic Energy**

In a circle, preferably made of copper, engrave with a sharp object the infinity symbol. It is an 8 but drawing it horizontally.

This talisman is advisable to hang it from the neck, and it is important to know that the infinite sign is a great host of cosmic energy.
Talisman to Protect the Home

To enable our home to host positive energy, it is necessary to draw the infinity sign (it is a number 8 lying down), with a black tempera, using a clear cardboard as a base.

When the tempera dries, hang the talisman somewhere in the house where you usually spend most of your time.

It is not advisable to leave it in the bedroom, because, as this talisman is made to generate a lot of movement, it could be counterproductive and could bring complications to sleep.
Now I will help you to obtain fortune or economic success. To do this I will teach you certain ceremonies that white magic uses to achieve this.

**POTIONS**

It is a mixture, generally made with perfumes, flowers and herbs. It is important that the potion has an aroma that helps to release the energies required by the cosmos.

For making a potion, we must have a kettle, a good predisposition and a lot of faith on the part of the person who is going to make it.
POTIONS FOR OBTAINING MATERIALS

Potion A

You must heat it in the kettle, and simmer, the following elements:

- 2 liters and a half of water
- Four tablespoons honey
- 6 leaves of chamomile
- The peel of eight apples
- A little nutmeg

Once everything is put on the kettle, let it boil, and spread the steam around the house, mostly in the bedrooms, and where you keep your money.
Potion B

Heat in the boiler, over low heat, the following elements:

- 17 oz. of water
- 8 tablespoons of ginger
- 3 tablespoons marjoram
- Petals of a camellia
- 7 peeled and chopped walnuts
- A coffee spoon
- 1 cup of cardamom seeds
- 5 oz. of peppermint oil

As the potion warms, repeat the following sentence:

"By the energy of this aroma, may wealth come into my home, and drive away poverty forever. Amen".
AMULETS

We call an amulet a portable element that is given a supernatural power, and that is used both to reverse some situations or to protect us from some damage or danger.

AMULETS TO WARD OFF POVERTY

You will see below a series of amulets with a very powerful charge to ward off poverty, and to protect those who carry it from any negative energy that may hinder material or economic growth.
Amulet A

It is advisable to do it in a glass bowl (it will be used only for this purpose), you will place there the following elements:

- 8 honey candies
- A quarter of a pineapple
- 4 cloves
- 1 blackberry

Spray all these ingredients with castor oil, and put it in a place in the house for 15 days.

Once this time has passed, put all the elements in a dark colored bag, and you must take it with you when you need money.
Amulet B

Get a dollar, then a chestnut. Wrap the chestnut inside the dollar, and tape it up.

For a week you will have to place the dollar and the chestnut inside a pyramid, possibly made of cardboard.

This way the dollar will be impregnated with good energy. After seven days, take the dollar and place it in your daily wallet.
PRACTICAL AMULETS

Amulet to Drive Away Bad Influences

You need:

- 2 nails
- Wire
- Holy water

Make a cross with the nails, joining it with the wire, and pour holy water on it to impregnate it with good energies.

When the lunar phases are in the first quarter, you must leave the cross for three nights outdoors.

Then, you will wear the cross around your neck, or inside your clothes.
Amulet to Attract Good Luck

Elements needed:

- A glass bottle of approximately 3 inches high
- 4 leaves fresh basil
- Three different types of rice grains
- 1 cork
- Paraffin

Put the bottle in water in a saucepan, and boil it with the basil leaves for half an hour. Once this is done, and the bottle is dry and cold, you must fill it with the rice grains. Close the bottle with the cork, and seal the outside with kerosene. It is best to carry this amulet in your wallet, handbag, pocket, or underwear.
AMULET TO PROTECT THE HOUSE OF BAD INFLUENCES

To protect the home from negative vibes, red silk belts, olive branches, and garlic should be tied and hung around the bedrooms and on the front door.

Amulet to Avoid Lawsuits or Legal Problems

It requires:

- A coconut
- 1 white candle
- 1 golden candle
- 1 dark green candle
- 1 red candle

Draw on the coconut, with the parafin of each candle, five-point stars, and 5 stars in total.

Then hang the coconut close to an opening, the closest to the front door of the house.
Ointments are liquid or pasty substances used for anointing, to produce curing or healing effects. They are widely used for protection.

**OINTMENT TO ATTRACT MONEY**

**Ointment A**

To make this ointment, you must mix the following elements:

- 10 oz. of sunflower oil
- 2 drops of lilac oil
- 4 drops of lavender oil
- 4 leaves of basil
- A piece of coconut-flavored soap

Once you have obtained this mixture, put it in a transparent glass jar, and keep everything
there for five days. After this time, spread the mixture on the tips of a bill, which you will then carry in your wallet or purse for daily use.

Ointment B

In a mortar, crush and grind the following:

- 3 cloves garlic
- 4 tablespoons of mustard seeds

After having crushed the ingredients, you must add:

- 3 tablespoons of almond oil
- 7 oz. grape juice
- 14 oz. cm3 of neutral gel
- A tablespoon of forest earth

Put this preparation in a clear glass jar, and seal it completely. After a week, spread it on the sole of your shoes to keep the money coming in. Use the shoes spread with this ointment.
PROTECTION TECHNIQUES

When we talk about protection techniques we can divide them in two:

Absorbent Protection Techniques

These are techniques that simply deflect bad energies to a different place from where the person is.

Those energies are absorbed by the place where we have sent them, or by some object in particular, then they are annulled.

This way the person will be protected.

These are techniques that belong to white magic, because they do not return negative energies to the person who sent them to us.

The typical absorbent elements are:

Water, Coal, Salt, Earth, Myrrh, Dark stones, Incense.
Barrier Protection
and Deflection Techniques

They work as a shield, because when these techniques are used, the purpose is to "bounce" the bad energies, which hit the shield, and return to their origin. This energy finally acts on the one who sent it.

They are faster and more active techniques than the previous ones, although they belong equally to white magic, because even though they are bad energies, they return only against the one who sent them.

The elements acting as a barrier and deflector are

Candles, Invocations, Mandalas, Sulfur, Amulets, Pentacles, Exorcism.
PROTECTION TECHNIQUES
BY FUNCTION

According to their function, protection techniques can be divided into:

Preventive Protection Techniques

These are used to prevent negative forces from entering our body or home.

These types of defenses can be used simply or through more complex ceremonies.

Among the simple methods of protection, we can use amulets, scrolls, the cross of Caravaca, stones, plants, etc.
**Exorcising Protection Techniques**

They are applied once we are aware that someone has cast a harmful spell against us, it will be healed, nullified, or reversed.

This may result in the harm returning to the sender, or to the person who requested it, if an intermediary was used. The law of causation is used here.

The exorcism rituals of the Christian religion (and of other religions), are complicated forms of protection, as are the "counter-spells", mandalas, etc.
OILS

They are used to cause a great effect on our emotions. The oils can be mineral, vegetable or animals.

- Mineral oils, containing a lot of earthly quality, are advised to fulfill earthly desires,
- Vegetable oils have a great vibration, or soul, of the plant from which they come,
- Animal oils are used in black magic.
Herbs Most Used in Spells

Cinnamon

It works as a protection against envy and jealousy of others. Put half a teaspoon of cinnamon in a white dish and mix it with a cup of unscented talcum powder.

This mixture is used for powdering to protect.

Marian Thistle

It is commonly called thistle. It is used as an amulet of good fortune and success, and helps to absorb bad influences.

It can be placed in the house to attract the good luck, or it can be carried with you. If it is placed in the house, it is advisable to change it every seven days.
Jasmine

Jasmine is generally used to attract good luck. It can be material, professional, loving or economic.

It is advisable to always carry it in a pink or light blue bag, made for this purpose. It can be used in all types of ceremonies.

Bay

Bay leaves are used to get wishes. You have to do it in the following way: with a lot of faith, write your desired wish on a piece of paper.

Then fold it in 3 parts, and put a bay leaf on each part. Put it in a private and secret place.

Once your wish is fulfilled, burn the paper with the bay leaves, at Easter or Thanksgiving.
Lilac

Lilac is used to attract tranquility, peace and harmony to the home or work environment. It is best to place the lilac in a clear bag.

Nutmeg

It works for freedom. Light a charcoal, and put the nutmeg powder around it.

Charms, Spells and Herbs

How to Create Spells

You will probably be interested in this part or section. You should know that in the life of wizards everything is magic. Even the most absurd and minimal detail of their everyday life. Even the people they meet throughout their history, the paths they walk, the "coincidences", their whole world is magic.

Casting a spell is not so simple or easy. It is a real art itself. It is the technique of practicing and working, making mistakes and learning magic. It is making what you think and wish come true, in a voluntary act, using specific words, and emanating great devotion.

We are talking about spells that do not harm others, nor do they have harmful purposes.

Sometimes this decision is complicated and not as easy as it seems, but I strongly recommend that you only cast spells that do not harm other people, as the universe takes care of bringing those bad energies back to you.
Spells must be planned in advance. These are serious things that must be perfectly planned, as you would do in any ordinary job.

You should not expect to sit down in front of a candle with an incense, say a few words, and expect that everything will work, magic is not like that, it requires time and a lot of concentration.

Some people only acquire the ability after several years, but if you give it the importance it deserves and you are persevering you will see results much sooner.
Making the Spell

When you want to cast a spell on your own, it's important to write down the spell. The prayers that will be spoken must be thought and meditated upon very carefully.

All your requests, and affirmations will be thrown into the universe and will always be fulfilled if you have that conviction within you. That is why we have to do them carefully.

By sending a request to the universe, you unknowingly connect to a system of deities and a world completely unknown to us.

Don't think that a good spell should have a rhyme either, it doesn't, but it should simply sound harmonious when recited. Also try to be clear and concise, so that there is no doubt about what you are asking for in your request. The spell should be easy to remember, and have that harmonious rhythm we told you about.
Many wizards have particular words to initiate spells, and to finish them. These are phrases that they like and, as time goes by, they refine and take what works for them. An example of a spell start used is:

"On this night and at this hour,
To the ancient power I now invoke,
O god and brilliant consort,
I ask that your light brings me."

While invoking a spell initiation prayer, one must visualize that energy and light travel and are channeled through oneself. Then, once you feel aligned with the deities, by a new prayer, you will ask for what you need or ask for help in what you plan to do.

For example:

"I have a wish that must be fulfilled.
I ask you (name of deity) to achieve the perfect (whatever) for (whatever reason)."
I ask the Universe to give me the necessary power from all astrological realms, to obtain my desired order. In this way, I attract specifically to my (desire) without harming the will of the universe, nor harm anyone.

I proclaim that this spell is cast. It (desire) is mine!

In no way will this spell be reversed, nor will any curse come to me!

So be it!"

It is always important to thank a deity you have invoked, even if it is a simple spell.

When we talk about spells, we should know that we can use many elements.

Those special ones for the ritual we want to do, and some others we want to add.
They can be candles, colored in a way we like or related to our purpose, stones, crystals, inks, parchment, etc.

When you create the spell, do it practicing several times on a sheet of paper, until you get the right text, one that you feel comfortable repeating.

Remember that mistakes made can be costly.
Spells per Quarter

The solstices and equinoxes are seen first and foremost as celebrations, but equally, they have much to do with the art of magic and witchcraft.

Each cycle has its own type of magic and it is good to keep this in mind when casting a spell that you have created or someone else has created.

These cycles are called Elementary Seasons:

- From March 21 to June 20 is the Planting Season.
- From June 21 to September 22, it is the Harvest Season.
- From September 23rd to December 20th, it is the Calculation or Planning Season.
- From December 21 to March 20 is the Replacement or Destruction Season.
Many of the spells that are cast will take you an entire quarter to verify and obtain the requested wishes. For that reason, in some cases, long-term goals must be scheduled.

Some spells can be cast to work from the next quarter, such as money spells. If a money spell was cast with little force at the time of its creation, you will notice that it usually starts to fail four weeks (1 month) before the end of the quarter.

If it is cast correctly, by the end of the quarter, or earlier, you should be seeing good results.

A common spell cast quarterly is to burn money. Small bills, on a plate, preferably metal. It is a powerful spell with fire. While you burn your money, sing this:

"Saturn, Jupiter and dear sun
Join the fun
Silver priestess dances with me
This quarter brings me a lot of money".
Astrological correspondences, and their use in ceremonies, fill everyone's mind and generate much interest. We are all used to our astrological sign, we carry it innately since our birth.

When we look at our sign in relation to the heavenly bodies, we can even see deeper into our own essence, so that we can determine what time is best for casting spells; this also has to do with the purposes we seek. All spells, whether short or long term, are governed by the influence of our sign and the planets.

For a new wizard it is important to take into account the astrological correspondences (see Witchcraft Secret Manual). Know how to use the hours correctly, the days, and the lunar phases.
It helps the beginner wizard to have more luck in obtaining a request, it increases the chances of success.

If you have no knowledge of astrological correspondences, and you are in a hurry to begin, you must cast the spell, under the protection of a magical circle, and invoke the deities to use the correct astrological correspondences in your ritual.

Many other wizards may tell you that you do not need this. Many times, they will be right; there is nothing more important than your predisposition.

However, it is important to know that not using them will not harm your spells or your success. From my own experience, and after years, I can tell you that astrological correspondences enhance ceremonies and rituals, and that is why I advise you to use them always.
Performing Magic for Others

When you do magic for others, it is best to have the consent of the people who will be involved in the spell.

Before casting the spells you should try to consult your divining power in order to see what the result of your work will be. At the same time, you should use this power to anticipate everything related to the life of the person you will involve. It is not your intention to harm anyone, but without intending to, you can sometimes harm someone you do not even know.

That is why you must be very careful when you do magic for others, as we know that requests come true.

When planning your first spells, I advise you to work with the moon and its magic.

Start with small and simple things. The moon can teach you many things, it is a very powerful celestial body.
One of the things we must take into account when performing a spell is the lunar phase. The days of the full or new moon are the time of greatest concentration for casting a spell. They are powerful moments. Some also agree that the best days to cast a spell are three days before and three days after this lunar phase.

Remember that the new moon is to attract things to you, and to start new projects, it is the beginning, the beginning of something. However the full moon is to remove, banish, get rid of something bad, or vices.

Many times what you start at the new moon ends at the full moon. Anything that lasts longer, such as a money spell, or getting a job, should be started on a new moon since it will take several months to be completed.

Things in the full moon can become clearer, more focused, give you clarity that you didn't find before.
It is the key moment to clarify what you could not understand before, mysteries, hidden things, secrets. The full moon is used many times for divinatory purposes, and this has been happening since ancient times. The great flash of light that it possesses when it is in this phase unveils the darkness.

All work of magic aimed at exchange should be done on this moon as well. If you have to close some contract, exchange some good, some compensation, pay something, close a deal, do it when this lunar phase ends. This is the ideal time.

There are many witches who do not recommend practicing magic on the dark moon.

This cycle is considered as the three days before the new moon cycle. It is considered a time of instability and generates a deep vacuum. That is why curses are often performed on dark moons.
Absorb the Moon

When we talk about absorbing the moon, we are talking about acquiring part of its energy and essence in ourselves. That power we achieve in ourselves is called "Absorbing the Moon".

If you have reached this level, you will feel different, filled with energies and an incalculable power that radiates and passes through your material body.

When the moon is absorbed you must protect yourself, and this is done by forming a magical circle.

It is generally done in spells that require more seriousness. Likewise, it does not mean that it is necessary to absorb the moon in all spells. But of course, doing a ritual in tribute to this goddess, the moon, is always good.

Many Witches use their sticks when they want to absorb it. What you should do before, is to open your chakras, the 7 energy circles that own our bodies.
Then you must be the position of the goddess in your arms, with the stick in your right hand. Then slowly lift your arm over you, and together both hands on the stick, pointing to the moon and repeating:

"I now absorb the power of the moon in me, merging with its power."

This will increase your vibratory energy, and help the goddess' power to penetrate the rod. If you manage to absorb the moon, you will easily notice that something changes.

Next, lower the rod, and aim for your heart chakra, that is, the heart. Concentrate and imagine a silvery blue light entering your body, circulating through your blood, through your arms.

Visualize it throughout your astral and physical body. After a few minutes, lower your arms. The energy will have already dissipated, and you will have reached the highest power.
If you are going to do a spell, place the rod in your right hand to send the energy.

If you are not going to make any request or throw, leave the stick in your left hand, which is the receiving hand, and concentrate on entering a relaxed state, which will help you to absorb more energy.

**What Happens When a Spell Doesn’t Work?**

If you notice that things are not going the way you want, you should go back and ask yourself what you have done wrong, or possibly where you made the mistake.

Ask yourself a few simple questions about the moment you cast the spell, how you felt, were you well-disposed at the time, what was your attitude, were you interrupted, did you have the concentration and devotion that goes with it, did you even believe that you deserved what you were asking for, could the spell be unethical?
Remember when this kind of thing happens, that the world has been set up for all of us to discover its magic and learn to enjoy it.

Whatever you request from the universe, sooner or later it will grant it to you.

We must only learn to ask for it, believing ourselves worthy of such requests.

If you have tried to check everything and you don't find out what the problem might be, sometimes it happens that the person who has asked you to cast a spell is the same person who is unintentionally blocking the energy of the spell.
Make a Routine from Practice

Once you have reached a certain level of study and knowledge related to White Magic, what you must add is the courage, the action to practice magic, where you can, and at the moment you consider, and not being afraid to make mistakes and learn from your mistakes.

You have to know that this requires practice. Doing it alone is like starting your own business or enterprise for the first time.

Everything you put in or take out will be after a great deal of effort from you.

You must believe in yourself, in your power, and be sure of it. You must be persistent, not giving up at the first attempt, that is fundamental. This is the only way you will learn and grow in this new path.

It takes real courage and courage to practice magic on your own, being alone, with candlelight, and hoping to get results.
It is very common for people to start with spells, try them, get discouraged and never do them again. They simply determine that this was not the way they wanted to go.

That is the fear of the new, of the unknown, of fantasies, and of their own mental power.

The first time something doesn't work, they convince themselves it's not their thing, and they give up.

If this has happened to you, remember that up until this moment you have not practiced witchcraft.

What you have done is simply set up the stage and gather the necessary elements for the ceremony, but you haven't started yet, you have only studied witchcraft.

Only when you absorb the moon and perform an active ritual, you will be practicing the art of witchcraft.
Energy, Spells and Ceremonies

As we well know, energy is something that can be felt. Each person feels it differently.

There can be changes in your body temperature, in your senses, some kind of tingling or particular vibration.

It is good when your energy increases. For this you need to be free and centered.

To free yourself means to take root in the mother earth and stabilize yourself.

To center is to put your energy in the navel to obtain a calm and quiet state. You must practice to achieve this, it is absolutely necessary.

You must know that you cannot work with maximum efficiency always, but if you are very tired, badly psychologically, or stressed, it will surely be more difficult for you to find this high energy. In that case we advise you to save the work for another day.
If this happens to you, and you can't increase your energy, don't worry, it's normal. We are not always able to gather the right amount of energy.

This will come with time, we are all capable of increasing our energy.

You just have to find the right moment.
Energy, Alcohol and Drugs

What we are referring to in this paragraph is that it is not convenient to mix alcoholic beverages when you are about to perform a job. What is also indicated is that your body should be clean of alcohol at least 48 hours before performing the ceremony.

Alcohol and magic do not usually work hand in hand.

It is not necessary to get into an ethical problem, nor is it our job to judge. But it is important to remember that an illegal substance can put you in jail for years.

If you need substances to stay awake and "energized" all day, it is obvious that you need psychological and medical help. Look for that help, magic doesn't have a good relationship with drugs.

People who use alcohol, and are addicted to it, as to drugs, cannot become sorcerers. A true sorcerer does not need to consume those substances that are toxic to the body.
On the contrary, he must be clean, and keep the body as healthy as possible. Otherwise they are not taking the responsibility that being a true sorcerer requires.

And you are neglecting your body, you, your family members and the Universe in general.

**Successful Magic**

When you see that your request has been fulfilled, don't forget and take note, verify how your request has been fulfilled.

Generally they are fulfilled in different forms than requested, and the results are not perfect in terms of shape and timing.

It does not happen like in the movies that by puckering the nose our dream comes true.

Many times, even if we don't notice it, the most common and ordinary circumstances are really magic.
Breaking a Spell

If a spell you have cast has blown up and is causing effects you don't want, you must finish it, break it. You should wait until the first Saturday after a full moon, or the day of the full moon itself.

Use one white and one black candle for contrast and balance. Get an amethyst stone, Apache tears or white quartz. Write your spell to break what you have done, you must be very clear.

This is an example:

"On the eve of... (Write the day)
A spell I cast
And those effects I created
I want now to break
Specifically (complete with the original request of the Spell)
May this spell break it
And I now receive the specific gift of (complete with new request)"
A spell should not last longer than sixty days, unless you have set other kinds of parameters, or are waiting for certain astrological correspondences that have a different limit.

Magical Alphabets

Spells that are cast with magic alphabets, such as rune stones, are very strong and easy to make.

It is not like herbs or other ingredients, where you have to rush out or sometimes it is difficult to get some element. Here few items are required.

A piece of virgin paper is used, some witches use a pen or marker, but I prefer black Indian ink, since it is an element that lasts a long time, it is charged with more energy and at the same time it is cheaper than the marker.
First you do the spell clearly in English, that is, you write the spell, and you check it to make sure you have done it correctly.

Then, you choose a magic alphabet, the one that makes you feel good and comfortable, and you transcribe it, letter by letter, to the paper with the Indian ink or the element you have chosen.

Once you have finished the transcription of your request, burn the paper when you cast the spell, on the plate that you use for these cases.

Conclusion

All the magic work you do can be very useful and beneficial, for you, and for those who need your help.

Now you are only beginning to do the basics in the art of magic, which later, once you understand it, you will put into practice in your daily life.

You will never forget what you have learned, it will always be moving within your subconscious.

Once you absorb the power of the moon, and feel that state of stillness and contentment, it can no longer be eradicated.

I always advise acting ethically, and not hurting anyone. Remember that the universe returns this kind of thing.

So behave well in life, otherwise you may experience many setbacks.

To Prevent Negativity Entering In Your Home

It requires:

- Thurible or clay bowl
- 3 coals
- 3 camphor tablets

How to Proceed:

The first thing you will have to do is light the three little coals, and put them together with the tablets inside the thurible.

Then you will make the sign of the cross, as soon as you begin the ritual, and at the end of it.
Charms, Spells and Herbs

You will go through all the rooms of the house, forming with the container and the smoke that emanates, the sign of the cross, while you repeat the following:

"I beg you Jesus, let only good, health, love, and prosperity enter this house. Let all evil, envy, and distress go out of here. Through Jesus Christ, Lord, Amen".

Averting Enemies and Danger

You should say the following sentence whenever you are in danger, or when you perceive that you are near a person with bad energy.

"In the name of the Father, the Son and the Holy Spirit, may the Lion of Judah overcome the tribe. Amen ". 
Spell To Clean a Business

How to proceed to clean our business with magic plants or herbs:

When you are starting a new business, or looking to remove bad energies from the place, to generate a change, it is convenient to follow these steps to cast the appropriate spell.

What you need:

- Pharmaceutical Alcohol
- A clay bowl
- 3 tablespoons powdered rosemary
- 2 tablespoons myrrh
- 3 tablespoons of powdered rue
- 6 dried red roses
- 1 tablespoon dried flowers
- 1 red candle

Now you will have to put all the herbs in the clay bowl and mix them.
Once you obtain a good mixture, pour a glass of alcohol. Put it on a table, and on its left side turn on the red candle.

The person in charge of performing this ritual should face south. The candle is placed at the left of the person and the bowl on the right.

Light an incense prepared with the herbs and alcohol with the left hand (be careful), and then light the candle. When the mixture and the candle are lit, you must repeat with great faith and devotion the following sentence:

"May the merciful Lord bless my business
Save the business (or say the name of the business)
That the Lord take care of all the members of the business
May the Lord bring success and plenty of work
May the Lord give us prosperity and lots of money."
Charms, Spells and Herbs

Help us St. Jude Thaddeus,
give us peace of mind.
Protect us from evil entering
this business. Amen.”

At the end of the prayer, after having repeated it ten times with much concentration, you must make the sign of the cross. When the ceremony ends, you must keep the business closed for 24 hours, allowing the new energies to destroy the previous ones.

When the appropriate hours have passed, open the business, and all the openings, to receive pure air, and to remove any negative residue that may have remained.

The herbs must be those mentioned in the necessary ingredients and not others, in this case you cannot substitute them. Concentration and faith are of vital importance, you must visualize the good energies and believe in them.
How to Release a Local or Business

The ceremony or spell presented below is intended to cleanse a business of bad influences and energies. It is also useful when it is believed that a spell has been cast against you.

It is important to perform this ritual with the openings of the room completely closed, almost sealed. An incense will be used, allowing you to reach all corners of the place.

It is advisable to do it on the weekend, since it is essential to keep the business closed for forty-eight hours.

What you need:

- 25 grs. of thyme
- 30 grs. of cloves
- 25 grs of cinnamon
- 40 grs of myrrh
- 30 grs powdered mallow
- 1 coal
All these elements or ingredients must be mixed in a mortar that resists fire. Once the elements are well mixed, make a pile in the center of the mortar and put the charcoal there.

Now proceed to light the charcoal and, when everything starts to smoke, repeat the following prayer:

"May your sacred fire Melchizedek, and your sacred fire powerful Abramelin, fulfill my deepest wishes, and make my business run smoothly. Let the evil that lurks in you be removed And be clean and protected. Amen."

It is important, as in the previous spell, to respect the quantities and herbs listed, without possible substitution.
