Some Tips to Keep in Mind

Hello my Friends.

This manual will give you tips for making Spells achieve effective herbal and other natural elements.

To begin, I tell you that when we decided to do a ritual or ceremony, it is essential to pay attention to certain ancestral advice.

It is very desirable to have all the elements listed in the ritual we perform, that everything is within your reach prior to the beginning of the ceremony.

Taking a bath to help us cleanse and purify. This can be done with a little rosemary, rue and laurel. These herbs are added into the bath water, if you don’t have one, the mix is thrown over the body in the shower, in the final rinse.

You must pass through the room where it was made with a smudging ritual. You can do
it with the stick or with coal in a censer or in a pan or bowl used for this purpose.

Flavourings are ideal: frankincense, sandalwood, myrrh, and nard. You must perfume the whole room.

Key will be to maintain optimal emotional state and in good physical and mental conditions, stripped of negative thoughts and concerns.
Spells and Talismans

Let’s start with some basics. To protect and make feel safe, so that no one can interfere in our energy, or exercise on our body or mind negative waves, sometimes it is necessary to make some kind of spell, or make a talisman.

Spell:

spell or incantation is called the ceremony or ritual magic meaning, which is done by saying certain prayers or invocations to achieve a specific purpose.

In general, we use the spell to remove negative entities that are outside a person's home or business.

They were formerly known as exorcism. In order to use certain formulas, are used words, candles, incense smoke and certain smells.
Talisman:

Talisman is called a magical figure in which we seek to represent a force.

This force that wants to be attracted should be represented in such a way that is in harmony with universal forces. It is very important to be clear about the reason for which one has to make the Talisman.

The manufacture should not be like a game or custom, it must be taken as a sacred art.

Do not forget that a Talisman attracts and it is in harmony with the Divine Universal Forces. It is very important the reason or purpose for which I will make the Talisman.

Well, from the moment I begin to generate it in my mind as an idea and until the end of it, I'm putting in it my energy. It is also very important that the bias and focus, during the construction of the Talisman.
Charms, Spells and Herbs

The traditional talisman is built on a piece of metal, mineral or rock that must be recorded and dedicated to exercise its real power.

Once set, no one except you can touch it. Another way to make a talisman is with a scroll, which should preferably be a virgin.

Any person can make a talisman, but it will give what it promises only to the person who consecrates it.

The power of this object is given to whoever possesses it, and with its use nobody might be harmed.
How to make Talismans

🌟 Love Talisman

This talisman is useful to preserve the tranquility and harmony in a couple. It protects from any negative influence that could affect it.

It is highly suggested to do this talisman on a Friday, when the lunar phase is in its fourth quarter, at the time of sunrise.

You should draw on a scroll, preferably a virgin, and a circle of 6 cm in diameter.

Cut out the circle made in the scroll and write the names of the couple, in red ink, following the contour of the circle.

On the other side of the circle, type "Venus" in the form of a cross, or both vertically and horizontally.
Charms, Spells and Herbs

Wrap the circumference in a tissue, not very large, light-colored, and there pour a few drops of perfume, the favorite of each of the members of the couple. The talisman should be kept in the bedroom, so that anyone but the couple can access it, or even see it.

🌟 Single Talisman to Reactivate Cosmic Energy

In a circle, preferably copper, engraved with a sharp object the infinity symbol. It is an 8. This talisman is advisable to hang on the neck, and it is important to know that the infinity sign is a great cosy of cosmic energy.

🌟 Talisman to Protect the Home

If we want our home to have positive energy, we must draw the infinity sign (it is a number 8 lying down), with a black color, using a cardboard base course.
When the pint is dry, hang the talisman somewhere in the house where you usually spend most of your time.

It is not advisable to leave it in the bedroom, because as this talisman is made to generate a lot of movement, could be counterproductive and could cause complications to sleep.
Potions, Talismans and Ointments

Now I will help you to achieve wealth or economic success.

This will teach you certain ceremonies which use white magic to achieve it.

Potions

It’s a mixture that is usually done with perfumes, flowers and herbs.

The important thing is that the potion gives off an aroma that helps to release energy required for the cosmos.

To make a potion, you must have a kettle, a good disposition and a strong belief by the person who will do it.

Put this preparation in a clear glass bottle and seal it completely.

After a week, rub the soles of your shoes so you don’t lack money. Use your shoes spread with this ointment.
Protection Techniques

When we speak of the protection techniques, they can be divided into two:

Absorbent Protection Techniques

Techniques that simply deflect bad energies to a different place from where the person is. Those energies are absorbed by the place where we have sent, or by some special object, and then vanish. Thus the individual was protected.

They are techniques that belong to white magic, because they do not return negative energies to which we send it.

Typically absorbing elements are:

Water, Coal, Salt, Earth, Mirra, dark stones, Incense.
Barrier Protection Techniques

They act as shields, as when using these techniques is to be bouncing off the bad energy, which hit the shield, and return to their origin. This energy finally acts on who sent it.

Techniques are faster and more active than previous ones, but also belong to the realm of white magic, because although they are bad energies, refunded only against those who sent it.

The elements that serve as barriers are:

Candles, Invocations, Mandalas, Sulphurs, Amulets, Pentacles, Exorcism.
Protection Techniques by Function

According to the role, protection techniques can be divided into:

Preventive Protection Techniques

They are used in order to prevent negative forces from entering our body or house.

You can use this type of defences alone or by more complex ceremonies.

Among the simplest forms of protection, we can use amulets, parchments, the cross of Caravaca, stones, plants, etc.
Exorcising Protection Techniques

They are applied once we have knowledge that someone has sent against us harm; so it is going to be healed, annulment, or will be reversed.

This can cause the damage back to anyone who gave or who will charge if you used a broker. It is used here the law of causation.

Exorcism rituals of the Christian religion (and other religions) are complicated forms of protection, like the "counter-spells", counter spells, the mandala, and so on.
Charms, Spells and Herbs

Oils

They are used to produce a great effect on our emotions. The oils can be mineral, plant or animal.

- The minerals contain plenty of earthly quality, and they are advised to fulfil earthly desires,
- The plants have great vibration, or soul, from the plant which they come,
- The animals are used in black magic.

How to Create Spells

This is the part or section that probably interests you most. You must know that in the life of a witch all is magic. Even the most absurd and minimal detail of their daily lives. Even people who know their history along the road that passes, the "coincidences", his whole world is magical.

Perform a spell is not so simple. It is an art in itself. It is the technique to practice and work, make mistakes and learn magic. You make what you think and want, in a voluntary act, using specific words, and emanating a great devotion.

We talk about spells that do not harm others, or having malicious purposes. Sometimes this decision is complicated and not as easy as it sounds, but only strongly recommends that you do spells that do not go against other people, since the universe is responsible for those bad energies back to you.
The spells should be planned in advance. These are serious matters that must be thoroughly planned, as you would in any common work. You should not expect to sit in front of an incense candle, say a few words, and that everything works, magic is not so, it takes time and concentration. Some people just have capacity after several years, but if you give it the importance it deserves, you will see results sooner.

**Making The Spell**

When you want to do a spell on your own, it is important to write the spell. The prayers must be thought carefully. All your requests and claims will be thrown into universe and always will be fulfilled if you have within you that conviction. Therefore, they must be made with caution. When sending a request to the universe, without knowing it, you connect with a system of deities and a world completely unknown to us.
Do not think that a good spell must have a rhyme, it is not, but it must sound harmonious when you recite it. It also strives to be clear and concise, there is no doubt that you apply to your request. The spell should be easy to remember and have that smooth rhythm that you discussed. Many Witches are individuals starting a word spells, and also to complete.

Some phrases that they like and that as time passes will refine and taking what works for them. An example of the beginning of spell that is used is:

"On this night, and at this time,
Now summon the ancient power,
Oh god, bright consort,
I ask that your light contribution."

While opening prayer evokes a spell, you have to see that energy and light travel and channeled through one. Then, once you feel aligned with the gods, by a new prayer, asking for what you need or asking for help in what you plan to do.
For example:

"I have a desire to be fulfilled. I ask (name of deity) to achieve the perfect (whatever) for (whatever reason).

I ask the Universe to give me the power to all levels of astrological, so I can get my order desired.

Thus, I draw specifically to me (I want) without affecting the will of the universe, nor harming anyone.

I proclaim this spell is done. The (desire) is mine!

No way this spell will be reversed, nor come to my no curse!

So be it! “

It is always important to add a thanks to the deity to whom I have called, even a simple spell.
When we talk of spells, we know that we can use many elements. Specially those who wish to perform the ritual, and someone else want to add. They can be candles, colors related to us or the end sought, stones, glass, ink, parchment, etc. When you make the spell, do practice several times on a sheet, until you achieve the appropriate text with which you feel comfortable repeating. Remember that mistakes can be costly.
Spells For Quarter

The solstices and equinoxes are first and foremost as a celebration, but also have much to do with the art of magic and witchcraft.

Each season brings its own kind of magic and is good to take this into account when you run a spell you've created or created by someone else.

These cycles are called Seasons Elementary:

- From 21 March to 20 June is the planting season.
- From June 21 until 22 September is the harvest season.
- From 23 September to 20 December is the season of calculation or planning.
- From 21 December to 20 March is the season of Replacement or Destruction.

Many of the spells that begin, take a quarter full in and get checked petitioned desires for
that reason, in some cases due to schedule long-term goals. Some spells can be launched to operate from next quarter, as money spells.

If a spell of money was made with little force at the time of preparation, because usually you will notice four weeks begin to fail (1 month) before the end of the quarter.

If thrown correctly, completed the quarter, or earlier, you must be having good results.

A common spell is to burn money. Banknotes of little value, on a plate, preferably metal. It is a powerful spell with fire.

While burning your dollars, sing this:

"Saturn, Jupiter and dear sun
Join the Fun
Silver Priestess dance with me
this quarter brings a lot of money to me"
Astrological Correspondences (Days and Hours Magic)

Astrological correspondences and their use in ceremonies fill everyone's mind and generate much interest. We are all accustomed to our astrological sign, which we innately have from birth.

When we look at our sign in relation to the celestial body, we can even see deeper into our own essence, and thus to determine the best time to perform spells, this is also related to the purposes we seek. All spells, whether short or long term, are governed by the influence of our sign and planets.

For a new witch is important to consider the astrological correspondences (see Manual Masters Wizards). Learn to use properly the hours, days, and moon phases.
It serves the beginner magician to have more luck in getting your request and increases the chances of success.

If you have no knowledge about the astrological correspondences, and you are in a hurry to begin, you must perform the spell, under the protection of a magic circle, and invoke the deities to the correct astrological correspondences are used in your ritual.

Many other witches may tell you that you do not need to do this. Many times they will be right; there is nothing more important than your bias.

But if it's important to know that if you don't use them, your spells will not be harmed. From my own experience, and after years, I can tell you that the astrological correspondences enhance the ceremonies and rituals, and that is why I advise you to use.
Performing magic for others

When you do magic for others, it’s best to have the consent of the individuals to be involved in the spell.

Before performing the spells you should try to consult your divinatory power to see the result that your job will entail. At the same time, you should use this power to anticipate everything related to the life of the person involved. It is not your intention to harm anyone, but accidentally, sometimes you can hurt someone who did not even know.

So we must be careful when doing magic for others, because we know that the orders do come true.

When planning your first spells I advise you to do work with the moon and its magic. Start with small and simple things. The moon can teach you many things; it is a very powerful celestial body.
One thing to keep in mind when performing a spell is the lunar phase. The days of full or new moon are the moment of greatest concentration for a spell. They are powerful moments. Some also agree that the best days for witchcraft are three days before and three days after this lunar phase.

Remember that the new moon attracts things to you, and start new projects, is the beginning, the beginning of something. But the full moon is to remove, banish, get rid of something bad, or vice.

Many times what begins at new moon, culminates in a full moon. That which lasts longer, as a spell of money, or getting a job, it must start at new moon and to take several months to complete.

Things on the full moon can be clarified, focus, give clarity not previously encountered.
It's time to figure out what key before you could not understand, mystery, hidden things, secrets. It is used to the full moon many times for divination purposes, and this is so since ancient times. The big flash of light has when it is at this stage reveals the dark.

All works of magic that aim exchanges should be done on this moon too. Yes you should close any contract, share some good, some consideration, the payment of something close a deal, and do it when this lunar phase finishes. It is the ideal time.

There are many witches who do not recommend practicing magic in the dark moon. This cycle is considered as the three days before the new moon cycle. It is considered a time of instability and creates a deep vacuum. That's why the curses are often made in the dark moon.
Absorb The Moon

From what we mean by absorbing the moon, is to obtain some of its energy and essence. This power in us that we call "Absorb the Moon." If you have reached this state, you will feel different and full of energy that radiates incalculable power and shift your body material.

When the moon is absorbed, you must be protected, and this is done by a magic circle.

It is usually done in jobs that require more seriously. Also does not mean that in all works it is necessary to absorb the moon. But of course I do a ritual in tribute to this goddess, the moon, is always good.

Many Witches use their sticks when they want to absorb it. What you should do before, is to open your chakras, the 7 energy circles that own our bodies. Then you must be the position of the goddess in your arms, with the stick in your right hand.
Then slowly lift your arm over you, and together both hands on the stick, pointing to the moon and repeating:

"Now I absorb the power of the moon in me, I am fused with her power."

That managed to increase your vibration energy, and helps the penetrating power of the goddess on the stick.

If you can absorb the moon, you will easily see that something changes. Then lower the stick, and sign up to your heart chakra, namely the heart. Concentrate and imagine a silver-bluish light moving through your body, your blood circulating, and your arms. Visualize in all your physical and astral body. After several minutes, lower your arms. Since energy is dissipated, and achieved the greatest power.

If you're going to do a job, place the stick in your right hand to send energy. If you will not make any request or release, leave the stick
in your left hand, which is receiving, and concentrate to get into a relaxed state, to help you absorb more energy.

What happens When a Spell Doesn’t Work?

If you notice that things are not going the way you want, you go back and question what you’ve done wrong, or possibly where you made the error.

Join a few simple questions about the time you perform the spell, how did you feel?, Were you well disposed to do so?, What was your attitude?, have you been interrupted?, Would you have the concentration and devotion that this entails?, Could it be that even you did not think you deserved what you were requesting?, "The spell could be unethical?.

Remember when you spend this kind of thing that the world has been made to discover all
Charms, Spells and Herbs

its magic and we have to learn to enjoy it. Anything that you ask the universe sooner or later this will be granted. Only we must learn to ask, thinking ourselves worthy of such requests.

If you tried to check everything and cannot find which the problem is, it sometimes happens that the person has asked you a job, is the same that is blocking unintentionally the spell energy.

Make a Routine From Practice

Once you've reached a certain level of education and knowledge related to White Magic, what you have to add is the courage, action to practice magic, where you can, and when you consider, and not to be afraid to make mistakes and so learn from your mistakes.

You have to know that this requires practice.
Doing so is as solitary first start your own business or enterprise. Everything you put or leave it will be after a great commitment and effort on your part.

You must believe in yourself, in your power, and be sure. You must be persistent, not to abandon the first attempt, it is essential. This is the only way you learn and grow in this new path. It takes real courage and guts to do magic for yourself, alone, with candlelight, and waiting for results.

It is very common that people start with spells, try, be discouraged and never do it again.

Simply determine that this was not the way they want to follow.

That is the fear of the new, the unknown, fantasies, and his own mental power. The first time something does not work, they give up.
If this has happened, remember that until now, you have not practiced witchcraft. What you did is just set up the stage and gather the necessary elements for the ceremony but you have not yet begun, one has to study witchcraft.

Just when you absorb the moon and perform a ritual activity, you shall be practicing witchcraft.
Energy, Spells and Ceremonies

As we know energy is something that can be felt. Each person feels it differently. There may be changes in the temperature of your body, your feelings, tingling or any particular vibration.

It's good when your energy increases. To do this you must break free and focus. That means free you, put down roots in the motherland and settle down.

Focus is to put your energy into the navel for a calm and quiet state. You must practice to achieve this, which is absolutely necessary.

Know that you cannot work as efficiently as ever, but if you're very tired, low mood, or stressed, it would be more difficult to find this high energy. In this case we suggest you save your work to do it another day.
If this happens to you, and you can’t increase your energy, do not worry, it is normal. We are not always suitable for collecting the amount of energy indicated.

This will come with time; we are all able to increase our energy.

Only you must find the right time.
Energy, Alcohol and Drugs

To which we refer in this paragraph is that it is inadvisable to mix alcoholic drinks when you make a job. Your body should be clear of alcohol at least 48 hours before the ceremony. Alcohol and magic do not usually go together.

It is not necessary to have a problem of ethical nature, nor is it our job to judge. But it is important to remind you that an illegal substance can lead to jail for years. If you require substances to be awake all day and "energy" is well known that you need psychological and medical need. The magic does not have good relationship with drugs.

People who use alcohol, and are addicted to it, or to drugs, they can’t become witches. A true magician does not need to consume these toxic substances to the body. On the contrary, he must be clean, and keep the body as healthy as possible.
Charms, Spells and Herbs

Otherwise they are not taking the responsibility that needs to be a real witch. And they are forgetting about his body, of yourselves, your family and the universe in general.

**Magic With Success**

When you see that your wish has been fulfilled, check how has your desire come to you. They usually come in different forms as they have been ordered; the results are not fulfilled to perfection in their ways and times. It is not like movies.

Sometimes we notice it or not, the most common and ordinary circumstances are truly magic.
Breaking a Spell

If you let a spell and it has exploded and is causing effects that you did not want, you culminate it, break it. You must wait until the first Saturday after the full moon or full moon day. Use a white candle and one black for contrast and balance. Get yourself a stone amethyst, white quartz Apaches or tears. Write a spell to break what you've done, you should be very clear.

Here we leave you an example:

"On the eve of ... (full day)
A spell cast
And those effects created
I now break
Specifically (complete with the original desire of the spell)
I break this spell
And I now receive the gift-specific (complete with the new desire)"
A spell should not last more than sixty days unless you put other parameters, or you’re expecting certain astrological correspondences that have a different limit.

Magical Alphabets

The spells that are thrown with magical alphabets, such as rune stones, are very strong, and they’re easy to make.

It's not like herbs or other ingredients, where one has to run away or sometimes it is difficult to obtain some element. Here we require a few accessories. Use a piece of plain paper, some Witches use a pen or marker, but I prefer black ink as it is an item that lasts a long time, is fraught with more energy and time is cheaper than the marker.

First the spell is done clearly in English, write the spell, and check to be sure that you've been successful.
Then choose a magical alphabet, the one that makes you feel good and comfortable, and transcribe it letter by letter, to the paper with the ink or the item you've chosen.

Once you've completed the transcription of your request, burn the paper to cast the spell, in that dish you use for these cases.
Conclusion

All magic work you make can be very useful and beneficial for you and for those who need your help.

Now just starting to do these bases in the art of magic, then, once understood, you will put them into practice in your daily life.

You will never forget what you’ve learned, it will always be moving into your subconscious.

Once you absorb the power of the moon, and feel that state of quiet and contentment, you cannot be eradicated.

I always advise to act ethically and do not harm anybody. Remember that the universe returns these things. Therefore conduct well in life, if not, you can meet with many setbacks.

*Protect us from evil than ever among the business.*
*Amen.*

At the end of the prayer, after having repeated it ten times with great concentration, you should make the sign of the cross.

When you finish the ceremony, you must keep the business closed for a period of 24 hours, to destroy the bad energies.

When the corresponding time has passed, open the business, and all the windows to receive fresh air and to eliminate any remaining negative energy that may remain.

The herbs should be those listed in the ingredients and not others, in this case you cannot replace them.

It is vital to have concentration and faith; you must see and believe the good energies.
How to Release a Local or Business

The ceremony or spell presented below, aims to clean up a business from bad influences and energies. It is also useful when you feel that someone has made any spell against you.

It is important to perform this ritual with local openings completely closed, virtually sealed.

We will use an incense stick, and this way you can reach all the corners.

It is advisable to do it at the weekend because it is essential to maintain the business closed for forty-eight hours.

What you need:

- 25 grs. of thyme
- 30 grs. of cloves
- 25 grs of cinnamon
- 40 grs of myrrh
30 grs powdered mauve
1 coal

All these elements or ingredients should be mixed in a mortar to withstand fire. Once thoroughly mixed the elements at the middle of the mortar, do a kind of a mountain and put there the coal.

Proceed now to light the coals and when everything starts to smoke, repeat the prayer that we present below:

"May your holy fire Melchizedek,
And your sacred fire powerful Abramelin,
To fulfil my deepest desires, and make my business to function properly.
To eliminate the evil that lurks
And stay clean and protected.
Amen."

It is important, as in the previous spell, comply with the quantities and herbs listed above, no replacement is possible.
